DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.*Drawings*
2. The drawings submitted have been reviewed and determined to facilitate understanding of the invention. The drawings are accepted as submitted.*Claim Objections*
3. Claim 1 is objected to because of the following informalities: there is no antecedent basis for, "the largest one of those concentric circles ...", the proper form would refer to "a largest one of those concentric circles ..." Further, it is not clear how the concentric circles are "of" the core or cladding. Appropriate correction is required.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-9 are rejected under the judicially created doctrine of double patenting over claims 1, 4, 6, 7, 9, 11 and 13 of U. S. Patent No. 6,463,195 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: the fiber described in claims 1-5 of the current application are described in claims 1, 4, 6, 7, 9 and 13 of Patent No. 6,463,195. The method described by claims 6-9 of the current application are described in claims 1, 4 and 11 of Patent No. 6,463,195.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. European Patent No. 1 079 247 describes a polarization-maintaining fiber.

7. Prior art documents submitted by applicant in the Information Disclosure Statement filed on March 13, 2001 have all been considered and made of record (note the attached copy of form PTO-1449).
